Program Mission

Provide employees with information on available resources in the community.

Program Description

You can include information on available early childhood resources in your community on your employee pay stubs. For example, you might include information on the Strong Start Nevada Campaign or Nevada’s Silver State Stars Quality Rating and Improvement program. Messages can be tailored to meet your business’ and employees’ needs. It’s an easy way to help your team members navigate an often-complicated system of support services.

Program Benefits

When you provide information to your employees about resources that they are able to utilize, they feel a greater sense of support.

Logistics

Contact Jared (Southern Nevada) or Kaia (Northern Nevada) for more information on resources in your community and for help developing language that can be used on your business’ pay stubs. We can help you locate the best resources for you and your employees.

Cost and Funding

Dependent upon how your employees’ pay stubs are processed, but typically no additional cost.
